

Eli Sadoff

EXPERIENCE

Software Engineer, Broadlume; Remote — 2020–2023

- Full-stack developer on projects in Ruby and C# for the backend; React 16+ with TypeScript on the frontend
- Developed internal tools to automate import processes resulting in significant reduction in workflow time for the catalog team in allowing for the importing of thousands records quickly from Excel
- Rewrote outdated web platform in modern architecture including Next.JS 12 from scratch
- Coordinated weekly team-wide programming meeting to share knowledge and tackle tough tickets

Backend Software Engineer, DockYard; Remote — 2019–2020

- Consultant in Ruby on Rails for other companies that were developing applications for 32 client hours a week with and the other 8 hours devoted to professional development
- Developed on external applications for clients in Rails that had requirements for offline usage as well and heavily throttled connections leading to knowledge of mobile websites for 3G internet speed

Software Developer, Comcast; Philadelphia — 2017–2019

- Senior developer on three applications for internal use with a large number of users
- Mentored junior developers in Ruby, Ruby on Rails, and React to allow all 6 of the developers to be able to contribute to all parts of the codebase
- Optimized DevOps automation pipelines in CircleCI and sped up the test workflow by 5 minutes by optimizing usage of parallel pipelines

Software Developer, Ardian Group; Boothwyn, PA — 2017–2017

- Full stack developer in Ruby on Rails and Angular for an application used at high-profile events
- Led conversion of app from Angular.JS to Angular 2+ to allow for the app to be more maintainable
- Wrote a small companion android app and corresponding API wrapper in Kotlin 1.1 as the only developer on that android project
